In the context of the European framework in which we find ourselves, the internationalisation of the Research in our University is one of our main objectives.

### Brief description of the Centre/Research Group (including URL if applicable):

CEU Cardenal Herrera University belongs to the CEU San Pablo University Foundation which is a non-profit charitable educational institution with over 75 years' worth of experience in the field of education. In the context of the European framework in which we find ourselves, the internationalisation of the Research in our University is one of our main objectives.

The CEU Research Institute of Design, Innovation and Technology (IDIT) hosted by Universidad CEU Cardenal Herrera de Valencia was created in 2004 to promote and stimulate scientific and technical

updating and to encourage agreements for scientific and technical cooperation with other public or private entities. The research team include 17 members and have made significant breakthroughs in the field of multi-physics modeling and advanced numerical simulation.

### **Project description:**

This line seeks to enrich the knowledge in matters related to architecture and urbanism, from its theoretical and conceptual dimension.

This line should seek to analyze, interpret and offer creative proposals on the stage of ideation that is born, it develops and survives the architectural-urban project, helping to overcome the socio-economic difficulties being experienced by the country in general and the sector Architecture and Urban Planning in particular. This will lead to the establishment of links between thematic areas such as formal development, cultural memory or historical reading, specifically assessing the commitments that exist between the project and place, understood in its multiple meanings: geographic-climatic, urban, landscape or sociocultural.

Research linked to the topic of the composition and the architectural design is critical to building a methodological corpus with which professionals can deal with more robust project development; it depends on the quality of the constructed realities (architectural pieces and urban areas) which can benefit the whole of society.

### **Applications**

Please send CV and motivation letter.
